

Change-over ball valve, 3-way, Internal thread

- For open and closed cold and warm water systems
- For switching functions on the water side and 2-point controls in air handling units and heating systems
- · Air bubble tight

| Type overview | | | | |

| I | nni | nnical |
|---|-----|--------|

| Functional dat | a |
|----------------|---|
|----------------|---|

| Media | Cold and warm water, water with glycol up to max. 50% vol. |
|-----------------------------|--|
| Medium temperature | -10100°C |
| Medium temperature note | The allowed media temperature can be limited, |
| | depending on the type of actuator. Limitations |
| | can be found in the respective data sheets of |
| | the actuators. |
| Rated pressure ps | 1600 kPa |
| Closing pressure Δps | 500 kPa |
| Differential pressure Δpmax | 350 kPa |
| Differential pressure note | 200 kPa for low-noise operation |
| Leakage rate | Leakage rate A, air-bubble-tight (EN 12266-1) |
| Pipe connectors | Internal thread according to ISO 7-1 |
| Angle of rotation | 90° |
| Installation position | Upright to horizontal (in relation to the stem) |
| Maintenance | Maintenance-free |
| Housing | Brass body nickel-plated |
| Closing element | Chrome-plated brass |
| Stem | Nickel-plated brass |
| Stem seal | O-ring EPDM |
| Valve seat | PTFE, O-ring EPDM |
| | |

Materials

Safety notes

- The valve has been designed for use in stationary heating, ventilation and airconditioning systems and is not allowed to be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The valve does not contain any parts that can be replaced or repaired by the user.
- The valve may not be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- When determining the flow rate characteristic of controlled devices, the recognised directives must be observed.

ZR2350

Product features

Mode of operation

The change-over ball valve is adjusted by a rotary actuator. The rotary actuator is connected by an open-close signal.

Accessories

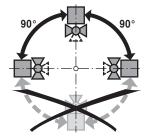

| | Description | Туре |
|------------------------|--|--------|
| Mechanical accessories | Pipe connector to ballvalves DN 15 Rp 1/2" | ZR2315 |
| | Pipe connector to ballvalves DN 20 Rp 3/4" | ZR2320 |
| | Pipe connector to ballvalves DN 25 Rp 1" | ZR2325 |
| | Pipe connector to ballvalves DN 32 Rp 1 1/4" | ZR2332 |
| | Pipe connector to ballvalves DN 40 Rp 1 1/2" | ZR2340 |

Pipe connector to ballvalves DN 50 Rp 2"

Installation notes

Recommended installation positions

The ball valve can be installed upright to horizontal. The ball valve may not be installed in a hanging position, i.e. with the stem pointing downwards.

Water quality requirements

The water quality requirements specified in VDI 2035 must be adhered to. Belimo valves are regulating devices. For the valves to function correctly in the long term, they must be kept free from particle debris (e.g. welding beads during installation work).

The installation of suitable strainer is recommended.

Maintenance

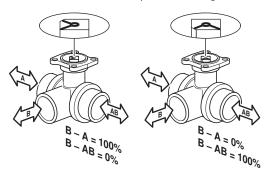

Ball valves and rotary actuators are maintenance-free.

Before any kind of service work is carried out on the actuator, it is essential to isolate the rotary actuator from the power supply (by unplugging the electrical cable). Any pumps in the part of the piping system concerned must also be switched off and the appropriate slide valves closed (allow everything to cool down first if necessary and reduce the system pressure to ambient pressure level).

The system must not be returned to service until the ball valve and the rotary actuator have been properly reassembled in accordance with the instructions and the pipeline has been refilled in the proper manner.

Flow direction

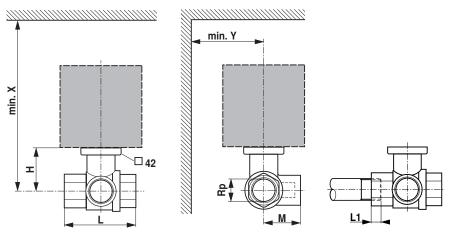

Please also ensure that the balls are in the correct position (marking on the spindle). Normally, the port designation AB is the quantity constant with 3-way valves. In the case of the BL versions, port B is designated the quantity constant.

Dimensions / Weight

Dimensional drawings

L1: Maximum screwing depth.

X/Y: Minimum distance with respect to the valve centre.

The actuator dimensions can be found on the respective actuator data sheet.
